Your Zooniverse project - subject set import success ⅀

no-reply@zooniverse.org

to me ▾

Hi Project Team,

Regarding your subject manifest import to the subject set named: 'cutouts_7'

Your subject set manifest import has completed successfully.

Please visit https://www.zooniverse.org/lab/19405/subject-sets/108134 to view the imported subjects from your manifest.

Regards,
Zooniverse Team

cutouts_7 #108134

A subject is a unit of data to be analyzed. A subject can include one or more images that will be analyzed at the same time by volunteers. A subject set consists of a list of subjects (the "manifest") defining their properties, and the images themselves.

Feel free to group subjects into sets in the way that is most useful for your research. Many projects will find it's best to just have all their subjects in 1 set, but not all.

The project has 0 uploaded subjects. You have uploaded 10 subjects from an allowance of 10000. Your uploaded subject count is the tally of all subjects (including those deleted) that your account has uploaded through the project builder or Zooniverse API. Please contact us to request changes to your allowance.

We strongly recommend uploading subjects in batches of 500 - 1,000 at a time. When uploading large numbers of subjects, we recommend using our Panoptes command line interface or our Panoptes Client package for Python rather than the web portal.

NAME

cutouts_7

A subject set's name is only seen by the research team.

This set contains 10 subjects:

81075441
81075440
81075438
81075437
81075435
81075434
81075432
81075431
81075429
81075428

Page [1 ⌄] of 1

Drag-and-drop or click to upload manifests and subject images here (you must select the media files as well as the manifest)
Manifests must be .csv or .tsv. The first row should define metadata headers. All other rows should include at least one reference to an image filename in the same directory as the manifest.
Headers that begin with "#" or "//" denote private fields that will not be visible to classifiers in the main classification interface or in the Talk discussion tool.
Headers that begin with "!" denote fields that **will not** be visible to classifiers in the main classification interface but **will be** visible after classification in the Talk discussion tool.
Subject images can be up to 1000KB and any of: .jpg, .jpeg, .png, .gif, .svg, .mp3, .m4a, .mpeg, .txt, .json and may not contain /, \, :, ,
